What is ADO.NET?

- ADO.NET (ActiveX Data Objects .NET) is a data access technology provided by Microsoft as a part of the .NET Framework.
- It is designed to enable developers to <u>interact with relational</u> databases and other data sources in a consistent and efficient manner.
- ADO.NET provides a set of classes and components that allow developers to connect to databases, execute queries, retrieve and manipulate data, and perform other data-related operations.
- ADO.NET is a powerful and flexible technology for accessing and manipulating data in .NET applications, providing efficient and scalable data access capabilities.
